Art.-No. 1552015

Description

Micro Coring Tine D=7*80 / Mount D=8

Highlights

- Suitable for aerating and to control thatch by pressing out a core.
- For smaller working depths within the root bed.
- Conical tine tip with knife edge for a clean cut at the edge of the hole.
- Ejection channel guiding the core to eject and deposit the core cleanly.
- Optimal balance between wall thickness and core for long life with maximum soil opening.
- Additional processing of the cores by clearing, taking away or processing
- Cutting through compaction levels.
- Turf can be played on immediately.
