Art.-No. 1555003

Description

ROOTKNIFE / 20*5*175 / MOUNT=12

Highlights

- Working depths possible of max. 150 mm.
- Openings in the soil are slot-shaped. Little danger of drying out in hot weather.
- Very little soil squeezed out. Thus nutrient uptake is not hindered and no waterlogging.
- Stimulation of root growth through trimming of the side roots.
- Especially well- suited for regular maintenance of surfaces that are frequently played on.
- No discarded soil, which means no subsequent work needed (e.g. rolling).
- Optimal use when games are ongoing. No change in the behaviour of the ball.
- With minimal working depths, can be used also as a preparation for seedbeds.
- Stable enough to be used even with a brake angle.
- Particularly suitable on very soft surfaces that are difficult to aerate, or after excessively heavy precipitation.

Technical data

Tip	pointed
Quality	STANDARD
Product Category	Root Knife
Brand	WIEDENMANN
Machinetype	TERRA SPIKE XP6
	TERRA SPIKE XP8
	TERRA SPIKE GXI 6
	TERRA SPIKE GXI 8
	GREENS TERRA SPIKE G6/135
	GREENS TERRA SPIKE G6/160

	TERRA SPIKE XF 6
	TERRA SPIKE XF 8
	TERRA SPIKE XD 6
	TERRA SPIKE XD 8
	TERRA SPIKE SL6

Unit mm

Tine mount	12,00
Outside diameter	19,00
Working depth	175,00
Total length	220,00
Rib width	5,00

Unit inch

Tine mount	1/2
Outside diameter	3/4
Working depth	7
Total length	8 5/8
Rib width	0,20
