Art.-No. 1500136

Description

SOLIDTINE D=20*250

Highlights

- Large-size hole diameter for processing compacted earth (hot spots) and preparing the top dressing.
- Especially suitable for regeneration measures outside the games.
- Diagonal tine tip, usable on both sides, guides tines into ground at the desired angle.
- Compared with tapered tine tip the diagonal tip reduces soil discarded at the surface.
- Less soil extrusion and thus fewer compactions in the tine canal.
- No vacuum effect when the tool is extracted.
- No surface soil is extracted.
- Clean hole pattern with very small spacing between holes.
- Turf immediately playable.
- Long service-life because of top-quality base material and precise hardening process.

Technical data

Tip	Schräg
Quality	STANDARD
Product Category	Solid
Brand	WIEDENMANN
Machinetype	TERRA SPIKE XP6
	TERRA SPIKE XP8
	TERRA SPIKE XP10
	GREENS TERRA SPIKE G6/135
	GREENS TERRA SPIKE G6/160
	TERRA SPIKE XF 6

	TERRA SPIKE XF 8
	TERRA SPIKE XD 8
	TERRA SPIKE XD 6

Unit mm

Tine mount	M14
Outside diameter	20,00
Working depth	250,00
Total length	301,00

Unit inch

Outside diameter	3/4
Working depth	10
Total length	12
Tine mount	M14
